OBJECTIVE

Front-End Software Engineer with 4+ years of experience in Angular and responsive web applications, eager to drive innovation and enhance user experiences in agile environments.

WORK EXPERIENCE

Software Engineer

April/2025 – Present

Enstack — BGC, Taguig City, NCR

- Assigned as the primary front-end engineer for both the Enstack app (iOS and Android) and webstore.
- Resolved 30+ UI/UX and functional bugs, significantly improving app stability and user experience.
- Implemented internationalization (i18n) support specifically for the Thailand version of the app, including integration of language toggles, dynamic translation loading, and localization of UI text and date/time formats.
- Collaborated with backend and product teams to align front-end implementation with brand and user experience goals.
- Technologies: Angular, Ionic, Capacitor, TypeScript, HTML, CSS, Git, Figma

Software Developer

January/2023 – March/2025

Computer Professionals Inc. — Pasig City, NCR

- Spearheaded front-end development for Allianz PNB Life, converting 30+ detailed UI designs into seamless, responsive web applications using modern technologies.
- Upgraded Angular framework from version 15 to 18 in one of the projects, including updating 5+ related libraries to their latest compatible versions, optimizing performance, ensuring compatibility, and to enhance scalability and maintainability.
- Collaborated very closely with back-end developers to integrate robust APIs, ensuring smooth data flow and functionality across platforms.
- Led the front-end development team in the absence of the team lead, driving timely project delivery and maintaining high coding standards through collaborative code reviews.
- Technologies: Angular, TypeScript, HTML, CSS, Git, Jenkins, Figma

Junior Software Developer

March/2021 – December/2022

Computer Professionals Inc. — San Juan City, NCR

- Contributed to full-stack development for BPI/MS, focusing on creating and maintaining 15+ Angular modules for dynamic CRUD operations.
- Designed and enhanced the front-end of an online sales portal major feature, ensuring consistent user experience across the platform.
- Integrated advanced security features into the admin and main sections of the portal, enhancing data protection and system reliability.
- Technologies: HTML, CSS, Angular, TypeScript, MySQL, Node.js, AWS, Git

Developer Trainee

January/2021 – March/2021

Computer Professionals Inc. — San Juan City, NCR
